

Opening Minds

Values

Communication –

- Develop the skills to discover, acquire and communicate knowledge and information in a globalised world whilst using technology to deepen learning
- Foster effective communication multilingual environments and through non-verbal communication
- Listen to others carefully and consider their opinions and ideas
- Speak clearly using standard English and in an appropriate, respectful manner
- Use information you have selected and present this logically and appropriately

Stickability –

- Remain persistent and be reluctant to giving up
- Absorb setbacks and remain positive
- Stay involved with learning, be self-initiating and engage in open ended tasks
- Set targets which have a clear focus on outcomes and strive regularly to achieve these
- When faced with challenges, be creative and consider new ideas to tackle a problem

Community-minded –

- Be driven by a strong sense of right and wrong
- Be aware of, and address, environmental sustainability
- Recognise the importance of honesty and consider others needs and safety
- Show empathy for others
- Support others and help them learn
- Think about other people's feelings

Communication – the ability to effectively communicate with others.

Stickability – the ability to keep going at something even when it's challenging.

Community-minded – showing respect and empathy for others and fulfilling our responsibilities as members of our community.

Be the best you can be

Mental security –

- Manage my behaviour and emotions effectively
- Take time to weigh up tasks and see the bigger picture
- Welcome feedback and take this as an opportunity for self-improvement
- Understand mistakes can be a powerful learning tool
 - Maintain a healthy lifestyle
 - Practice self-regulation

Mental security - learning what we need to be mentally healthy and emotionally strong and seeking to create that for ourselves.

High aspirations – exploring future pathways and developing the skills needed to be successful in the workplace.

High aspirations –

- Take risks and persevere when trying out new ideas
 - Practice leadership and take the responsibility to improve lifestyle and careers
- Take pride in your own work, ability and successes and recognise personal areas of development
- Think critically to produce new and innovative ideas to solve problems
- Actively take on learning which is challenging
 - Work to meet deadlines
